Steps in Time Synchronization Using PAGASA NTP Server for Windows 7 and 8

Step 1: Click or select "Date and Time" in the system icon tray located in the lower right corner of the taskbar.

Step 2: "Date and Time" window will pop up. Then Click or select "change date and time settings..."

Step 3: "Date and Time Setting" window will show. Then select the tab "Internet Time".

Step 4: "Date and Time Setting" window will show. Then select the tab "Internet Time".

Step 5: After selecting the "Internet Time" tab, click or select the "Change settings..." button and the "Internet Time Settings" window will pop up.

NOTE: If you notice that after synching, your computer clock didn't match the PhST, just keep on refreshing until it finally synched with PhST. It is normal at the beginning, because it will take time to load a page. Refresh it at least three times (3x) until it displayed the correct PhST.
